PROFESSIONAL SUMMARY

Results-driven Software Development Engineer with nearly 4 years of experience designing and building scalable, high-performance cloud-native applications. Strong expertise in system design, microservices architecture, distributed systems, and serverless AWS infrastructure. Proficient in React.js, Node.js, TypeScript, and Flutter with hands-on experience in CI/CD pipelines, database optimization, caching strategies, and performance tuning.

EXPERIENCE

Software Development Engineer

Aug 2022 – Present

CloudBloom / Arivu

Bangalore, India

- Architected **Cygnus LMS**, a multi-tenant learning management platform using React.js/TypeScript and Node.js serverless backend on AWS Lambda, reducing infrastructure costs by **40%**.
- Designed microservices architecture with AWS Lambda, API Gateway, and Redis caching, achieving **60% reduction** in API response times.
- Developed AI-powered content generation system leveraging **OpenAI GPT** models for automated course creation, quiz generation, and flashcard synthesis, reducing content creation time by **75%**.
- Optimized PostgreSQL database queries and implemented connection pooling, reducing query execution time by **50% and supporting horizontal scaling**.
- Engineered cross-platform mobile application using **Flutter** with offline-first architecture, HydratedBloc state management, and automatic background sync for seamless iOS and Android experiences.

PROJECTS

Cygnus LMS Platform | **React.js, Node.js, AWS Lambda, PostgreSQL, Redis, OpenAI, TypeScript** 2022 – Present

- Built a scalable multi-tenant LMS with isolated data storage, custom branding, OAuth 2.0/SSO authentication, and personalized learning paths powered by algorithmic recommendations.
- Implemented RESTful API microservices for user management, content delivery, and assessment engine with comprehensive analytics dashboards using Chart.js.

Shabodi GUI Installer | **React.js, Tauri, Rust**

2023

- Developed a cross-platform desktop installer using Tauri framework, reducing application bundle size by **80%** compared to Electron, with AES-256 file encryption and modular atomic UI components.
- Built system compatibility validation with OS detection, port availability checks, and dependency verification for reliable enterprise deployments.

Shabodi Booster Streaming App | **Flutter, RTMP, Ant Media Server, WebRTC, BLoC**

2023

- Engineered a live streaming application with RTMP broadcasting supporting 1080p adaptive bitrate video, real-time stream health monitoring, viewer analytics, and interactive chat.
- Implemented BLoC state management with clean architecture ensuring 100% code testability; added boost activation system with timer-based scheduling and activity logging.

SKILLS

Languages: JavaScript, TypeScript, Dart, HTML5/CSS3, SQL, Rust

Frameworks & Libraries: React.js, Node.js, Express.js, Flutter, Redux, Material-UI, Chart.js, Tailwind CSS

Cloud & DevOps: AWS (Lambda, API Gateway, S3, CloudFront, DynamoDB), Docker, CI/CD, Serverless Framework

Databases: PostgreSQL, MongoDB, MySQL, Redis, DynamoDB

Architecture: Microservices, Serverless, REST APIs, MVC, BLoC, Clean Architecture, Design Patterns

Tools: Git, WebSocket, RTMP, Ant Media Server, Postman, Jira, Confluence

EDUCATION

Bachelor of Science in Computer Science

2018 – 2021

Remuna Degree College, Balasore – FM University

CGPA: 9.5/10.0

Full Stack Web Development – MERN Stack

Nov 2021 – May 2022

Masai School Intensive Bootcamp

800+ Hours of Hands-on Coding

CERTIFICATIONS

Cross Project Excellence Certificate – CloudBloom
